Professional profile

I have just completed my A Level studies at Strodes College. I am a hardworking, honest, and conscientious person that is willing to learn and gain experience in an adaptive environment.

Objective

I would like to apply for either an Apprenticeship or Job related to Computer Science or Business.

Education and Qualifications

A Level:	Computer Science	B
	Business	C
	Mathematics	D
GCSE:	Physics	7
	Chemistry	7
	Business	7
	English Literature	7
	Maths	7
	English Language	6
	Computer Science	6
	Geography	6
	Biology	6
	Physical Education	6

Achievements

I was a Prefect at Matthew Arnold Secondary School where I had the responsibility to organise events and I volunteered to give tours at open evenings.

I achieved the Platinum Chief Scout Award in Scouting which allowed me to work with others and gain skills such as problem solving and teamwork. I am also volunteering as a young leader for Scouts.

In Secondary School I also competed in a BP Young Scientist competition and won with my team from Mathew Arnold School which improved my critical thinking skills.

References

Please see below my College Teachers' References which I received at the end of my first year at Strodes College:

Business:

David is a very conscientious student who works hard to ensure he is up to date with his work. He contributes well to class and has a good grasp of the business theories and concepts taught.

Computer Science:

I feel you are currently working at the A/B border and effort is 1. You are an excellent troubleshooter and work very well with the other students, sharing your knowledge and understanding. I think you will be a great employee as you have those skills of communication and team work on top of your academic and programming skills.

Maths:

David has had a satisfactory term where good progress has been made.

Interests

I have a passion for programming (Python currently but also learning HTML and CSS to create a portfolio website from scratch). This has improved my problem-solving skills when trying to add new features. I have used my computer for many years which has given me a strong grasp over the windows operating system for troubleshooting as well as other basic computer programs (Chrome, Edge, Word, PowerPoint, Excel etc).
